PTC India trades 5,782 MUs volumes of electricity in January'21, 49.3% YoY growth

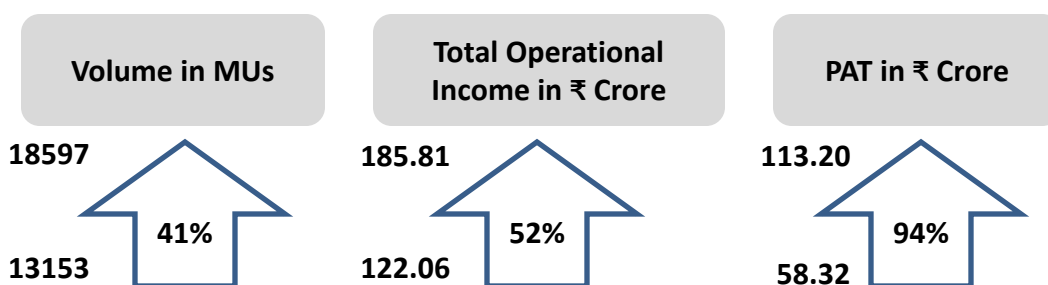

New Delhi, 16th Feb, 2021: PTC India Limited, the leading provider of power trading solutions in India, traded 5,782 MUs of electricity in the month of January 2021 in comparison to 3,872 MUs in the previous corresponding month of January 2020.

PTC continues to get a healthy contribution from its long and medium term contracts. In Short Term, Real Time Market transactions have given an opportunity for buyers and sellers to plan their procurement and sale of power with an hour's interval. PTC's contribution to the Real Time Market is ~48% of the total energy traded in RTM Platform. This has helped in better grid management and enforcement of DSM regulations

Contract Type	Volumes in January 2021, MUs	Volumes in January 2020, MUs
Long Term – Domestic	1,663	1,612
Long Term - Cross Border	173	123
Medium Term	502	492
Short Term - Bilateral	315	172
Short Term - Power Exchange	3,128	1,473
Total	5,782	3,872

PTC Announced its Financial Results for the quarter ended Dec 31, 2020 on 12th Feb, 2021.

Summary of Financial Performance for Q3 (FY20-21)

Commenting on the results, Mr. Deepak Amitabh, Chairman & Managing Director, PTC India Ltd. said: "PTC witnessed an all round volume growth led by the short term trades. This volume growth has been seen on the back of revival of economic activities, festival demand and Covid led changes in electricity consumption.

The timely fiscal intervention by the Central Govt. has aided demand creation and this year's budgetary focus on spending, development of industrial infrastructure is likely to further consolidate electricity demand in the country. The highest ever met demand of 185.82 GW in Jan -21 revalidates fiscal and monetary initiatives.

We remain cautiously optimistic of consolidating our leadership position based on the emerging opportunities in the coming quarters."
